Loybox, Jan 6 -The annual report of the board of agriculture on the sub-ject of pleuropucumonia does not, concary to expectation, make any refernce to the disease in America, or to the importation of American caltle. It is confined to home matters. A bril-Lant success is claimed for the system adopted by the board for stamping out the malady. During the year previous to the passage of the new law by

which this system was authorized, the userse existed in thirty-four counties.

It has been proved that one dealer at southampton has caused sixteen outbreaks of drease by selling eattle which had no outward appearance of discase. These enses are dilated upon by the board as showing the danger of relaxing the severity of inspection. There used to be a prejudice in

the minds of some of the people against taking patent medicines, but this has now been happily done away with, because people find that a patent medicine carefully put up in quantity is more apt to be the remedy for the malady, than when they are given a perscription hastily written by a physician who is worked nearly to death, and then filled by sleepy clerk at the perscription desk. A medicine like Keid's German Cough and Kindey Cure contains no poison or opiates, and can be relied upon to help the case which in claims to be able to treat. The success that ha attended it is marvellous on this account, and no one need be afraid to take it, for it contains no poison, and is free from opiates. BURIAL OF GEN. G. W. PATTERSON DAILY REPUBLICAN

> Coremontes at the First M. E Church, in the Presence of a Large Body of Odd Fellows -A Sermon

The body of the late George W. Pat terson was consigned to the tomb yesterday. It was in charge of the Odd Fellows and was buried with the honors of that order, of which he was a prominent member. For the last time the brother hood inoked upon all that remained of ived as they now live, and realized that visit with relatives in Jacksonville. he heart that once throbbed for others woes was consigned to its kindred dust. The religious services were held in the assement of the Fust M. E church and were conducted by Rev. James Miller The easket which contained the remains stood in front of the rostrum and was decorated with the flag of the Patriarch Militant and beautiful floral offerings from the fraternity. The larger floral offerings were the three links emblem ation of Friendship, Love and Truth and a pillow bearing the words "Our Comrada." All the Odd Fellow lodges

life," etc., which was followed with a hymn by the choir, composed of Misses Knieger and McKenzie and Messra. Bunn and Gher. Rev. Miller road in contrast the gloomy

portrayal of death as recorded in xiv chapter of Job: "Man that is born of woman is of few days and full of trouble," and the brighter future realized in Romans vin: "For I rackon that the sufferings of this present time are not worthy. to be compared with the glory that shall be revuled in us." After which he offered a fervent and reassuring prayer, and the choir sang "Nearer, my God, to

Mr. Mil ar took for his text from Ecolesiastes the words: "Then shall the dust return to the earth as it was and the spirit shall return to God who gave it." He said the text admitted three conditions: The contradiction of human nature; the contradictions of human destiny the double destiny of human nature The force of matter tends to pull down, while spiritual energy tends to build up. For a time in spite of this adverse force thephysical man builds up until it reaches a point where there is a poise as between the two forces, and for a few years, holds its own. But at length sickness comes, and the physical force is destroyed Death follows silently, slowly, but might-

some timus a few years lets. But there is a higher phase in this process of life and death, it is spiritual and divine, the physical is earthy and the spiritual side is heavenly, man not only returns to earth naturally but as naturally to God. The higher phases of man's existence are immortal. The final analysis shows that man's body is only dust, and that the spirit comes from God. All that is good and enduring in man re-

times it takes a few years longer, and

presents God. We shall always carry with us the image that we are heaven born children. The interest in this body is not, and the loss is not, the loss of the organized vital dust, but for the loss of the dwelling place of a boly spirit that made him the good, and true and noble man that he was. It is so held sacred and when we deposit this dust and set up a marble shaft to mark its resting place, it will be because it held the immortal spirit.

Mr. Miller after pronouncing a brief but beautiful enlows on the life of the

deceased which conformed to the teachings of the magnificent order to which he belonged, read a brief sketch of the life of the deceased.

THE CORTEGE The funeral cortege was formed in the following order, lodge officers in com-

At 1:45 this morning an accident occurred on the Wabash at Aladdin, a small town a few miles east of Hannibal. It was the place where the two limited Children by Karone City, twing the conenco and Kansas City trains pass, an

the esthound train was waiting at the station for the other to sidetruck according to the rules of the company.

The e gineer of the west-bound, Al Bourchard, was one of the oldest and most reliable man on the road, but was not well acquainted with the run from Bluffs to H noibal, and the night being foggy he probably fuled to see the switch ight or the depot either, and so crashed ato the standing engine of the other rain.
Buth engines were wrecked and Box

beth engines were wreeked and Bor-ohard pinned under his engine, his legs in the steam and fire. Water was poured on him and every effort made to save him until the engine could be mised, but he died before being moved. Engineer Wilcon's body was not found for some time and was chockingly mangled. Both trains took fire, and the baggage cars, two smokers and one chair car ware de-

STATE BOARD OF AGRICULTURE.

A Dense Fog the Cause of the President LaFayette Funk Ad dresses the Meeting at Springfield.

The state board of agriculture convened

for its annual meeting at Springfield

yesterday. The business was of a routine

oharaoter. President LaFayette Fank delivered an address. In the course of his remarks Mr. Funk said that the manifestations of a full confidence in the future value of an investment in farm lunds was one of the most hopeful indientions that the productive lands in this state will soon advance and in the not distant future reach much nearer their true value as a present and future invostment. There had not been a twelve menths in the past that had witnessed such a rapid advance in the price of average good farm lands as during the year 1891. In some portions of the state the advance in the price of lands the past season had been from  $15\,$  to  $\,25\,$  per cent, and a still greater advance may be xpected as soon as investers intelligently investigate the returns that may reason ably be expected from intelligent farm

Headen suggested that it was import into or the furners to not quickly important for the farmers to act quiexy in this master, as west and profitable new markets for animal and farm products had recently been opened to the American farmer and the prospects were most encouraging for wider and even more remunerative demands for the surplus the herds, and flocks and grain fields of The Leaning Tower at Saragess.

A committee appointed to report on the famous Toure Nuova in the Plaza i San Filipe, in the capital of Aragon, feared that this clock tower, a very line have caused a subsidence of the soil and the structure is deemed unsafe. The construction of this torre inclinada was begun in the Fifteenth century, under the direction of two Spanish, two Moorish and one Jewish architects it is octagonal in form, 300 feet high diameter, and leans about 10 feet out of the perpendicular. Stone steps, 200 in number, lead inside to the top gallery. It has been stated that the leaning of the tower was due to the caprice of the architects, but an old grack in its side and a careful examination of the founda-tion led to the conclusion that it was want of care on the part of the builders
